University of Clermont Auvergne, France

Bachelor's in Accounting and Finance

2022 - 2023

Corporate Accounting, Advanced Management Control, Corporate Finance

ACADEMIC PROJECTS/PRESENTATIONS

Econometric Project: Income Inequality, Health, and Environment

March 2025

Employed logit/probit models alongside panel data to analyze the relationship between income inequalities, environmental quality, and health. This approach enables a comprehensive examination of statistical interactions, offering insights into how economic disparities impact environmental outcomes and public health across different regions and time periods.

Macroeconometric presentation: Trade and Pollution in China

October 2025

Analyzed the impacts of Chinese exports on pollution and health using disaggregated data and robust econometric techniques, exploring mechanisms that link trade to the environment and public health.

RESEARCH SEMINAR

University of Clermont Auvergne, France

December 2024

Greening to shield: The impacts of extreme rainfall on economic activity in Latin American cities

University of Clermont Auvergne, France

January 2025

What size should urban green parks be? French evidence of the rental market

TEACHING EXPERIENCE

Teaching Assistant-University of Clermont Auvergne, France

2025 - present

- **Mathematics (1st-year Economics students):** functions, derivatives, optimization, descriptive statistics; led tutorials and provided academic support.
- **Statistics (3rd-year Economics students):** probabilities, estimators, inference; applied exercises and problem-solving sessions.

INTERNSHIP

INRAE and LEO-UCA, France

March 2025 - September 2025

Conducted an economic and environmental assessment of the agricultural transition in the Val d'Allier Nord region (France). Performed a comprehensive literature review to identify conceptual frameworks and existing indicators for assessing sustainability trade-offs in agricultural systems. Designed and conducted semi-structured interviews with local stakeholders (farmers, institutions, and environmental organizations). Built and analyzed sustainability indicators across economic, environmental, and social dimensions. Processed territorial and survey data using statistical and GIS tools (R, Excel, QGIS). Produced policy-oriented territorial diagnostics to assess trade-offs between agricultural practices, resource management, and sustainable development goals.

Université Lyon III Jean Moulin, IRPHIL, France

May 2024 - July 2024

Conducted IRPhIL's greenhouse gas (GHG) assessment using the 1point5 GHG tool, enabling the calculation of the carbon footprint and the preparation of the regulatory GHG assessment (BGES) for laboratories.

TECHNICAL AND LANGUAGE SKILLS

- **Technical Skills:** MS Office, LaTeX, STATA, Rstudio, Eviews, Python(beginner), QGIS.

- **Languages:** English (proficient), French (native), Ewe (native), and Spanish (beginner).
